

Real-Time Safety Without the Paperwork

SiteDocs® replaces paper binders, slow processes, and scattered signatures with a centralized safety platform built for the field.

Access real-time forms, signatures, reports, and certifications from any device so your team stays safe, your records stay complete, and compliance stays on track.

Trusted by the World's **Top-Rated EHS Professionals**

Save time and money

Automate safety documentation and cut manual paperwork.

Ensure audit readiness

Centralized digital records keep you compliant.

Reduce fines and incidents

Proactively address safety risks.

Scale operations with ease

Seamless rollout for teams of any size.

Within the first year of switching to SiteDocs, we estimate we saved over \$100,000 on admin time, paperwork, personnel, and training. The crews had very little pushback and adapted easily.

Chris Colley, Safety Director, Jakes Construction

How SiteDocs Works

Customize forms or use ready-made templates.

Complete forms in the field—online or offline—with GPS, date, and time stamps.

Add photos, voice notes, and corrective actions in real time.

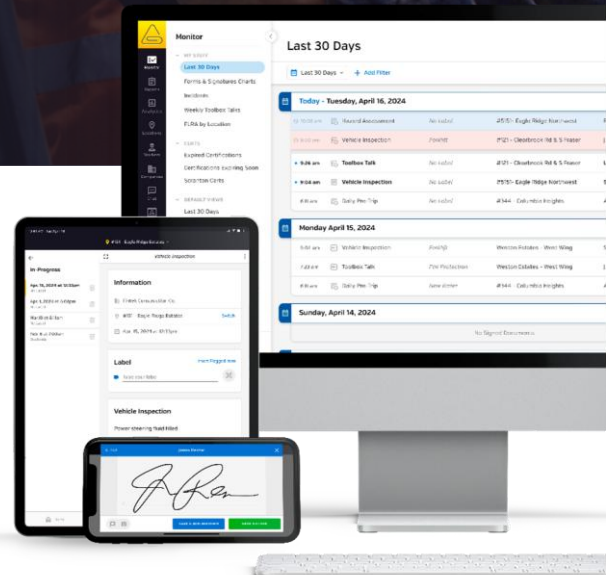

Monitor activity, track certifications, and pull audit-ready reports instantly.

Manage assets, set reminders, and store everything in one dashboard.

Top Use Cases

- Worker certification
- Incident reporting
- Safety audits
- Equipment management
- Hazard identification
- Scaling safety programs
- Contractor management

Rolling out SiteDocs across the company was fast. Training took just 20 minutes—it was easy for all ages to understand and adapt!
